

Our estimates/quotes are fully itemised, from a bag of sand and bag of cement to patio drive packs.

All labour cost are listed separately.

This gives a more accurate costing and lets you see clearly what materials are required to complete the work you have requested.

We can also break down each part of your garden into more detail if required, so you can for example have one for your lawn and one for your patio and another for lighting etc.

If for any reason we don't use all of the materials on your quote we will refund for the items not used. So you only pay for items you have used. All costs are regularly checked for the best price from our suppliers , if you require a special laid out quote or any further information please [contact us](#).
